Your network contains a server that has the Active Directory Lightweight Directory Services (AD LDS) role installed.

You need to perform an automated installation of an AD LDS instance.

Which tool should you use?

- A. adaminstall.exe
- B. dism.exe
- C. servermanagercmd.exe
- D. ocsetup.exe

Answer: A

Explanation:

To perform an unattended install of an AD LDS instance:

1. Create a new text file by using any text editor.
2. Specify the installation parameters.
3. At a command prompt (or in a batch or script file), change to the drive and directory that contains the AD LDS setup files.
4. At the command prompt, type the following command, and then press ENTER:

```
%systemroot%\ADAM\adainstall.exe /  
answer:drive  
:\&lt;pathname&gt;\&lt;filename&gt;.txt
```

They could be used to kick off the AD LDS installation wizard, but this would not be an unattend (automatic) install as the the scenario asks for.
