B. The row with the ID 0 is the first step executed in the

D. The EXPLAIN PLAN generates the execution plan and stores it
in PLAN_TABLE without executing the query. Subsequent
executions will always use the same plan.
E. The row with the ID 3 is the first step executed in the
execution plan.
Answer: A
Explanation:
Note the other_tag parallel in the execution plan.

Note:
Within the Oracle plan_table, we see that Oracle keeps the parallelism in a column called
other_tag. The other_tag column will tell you the type of parallel operation that is being
performed within your query.
For parallel queries, it is important to display the contents of the other_tag in the execution.
