**NEW QUESTION: 3**

If the valuation date is other than a fiscal period end, the analyst may assess the adequacy of particular reserve for:

- A. equity accounts
- B. uncollectible accounts
- C. collectible accounts
- D. individual asset valuation accounts

**Answer: B**

**NEW QUESTION: 4**

A company recently implemented hybrid cloud connectivity using AWS Direct Connect and is migrating data to Amazon S3.

The company is looking for a fully managed solution that will automate and accelerate the replication of data between the on-premises storage systems and AWS storage services.

Which solution should a solutions architect recommend to keep the data private?

- A. Deploy an AWS Storage Gateway volume gateway for the on-premises environment.  
Configure it to store data locally, and asynchronously back up point-in-time snapshots to AWS.
- B. Deploy an AWS DataSync agent for the on-premises environment.  
Schedule a batch job to replicate point-in-time snapshots to AWS.
- C. Deploy an AWS Storage Gateway file gateway for the on-premises environment.  
Configure it to store data locally, and asynchronously back up point-in-time snapshots to AWS.
- D. Deploy an AWS DataSync agent for the on-premises environment.  
Configure a sync job to replicate the data and connect it with an AWS service endpoint.

**Answer: D**

Explanation:

You can use AWS DataSync with your Direct Connect link to access public service endpoints or private VPC endpoints. When using VPC endpoints, data transferred between the DataSync agent and AWS services does not traverse the public internet or need public IP addresses, increasing the security of data as it is copied over the network.
