What is the name of the third party authority that vouches for the binding between the data items in a digital certificate?

- A. Certification authority
- B. Issuing authority
- C. Vouching authority
- D. Registration authority

Answer: A

Explanation:

Explanation/Reference:

A certification authority (CA) is a third party entity that issues digital certificates (especially X.509 certificates) and vouches for the binding between the data items in a certificate. An issuing authority could be considered a correct answer, but not the best answer, since it is too generic.
