quiz braindumps or the exam, you can contact us at any time, our customer service agents can be here at 24 hours in a day.

You can download the trial versions of the C1000-122 exam questions for free, Now, there is good news for the candidates who are preparing for the C1000-122 actual test.

Sfjbs Best way to pass your IBM C1000-122 Certification Exam, The IT experts in Sfjbs are experienced and professional, Also, this content material can boost your confidence by providing you with enough knowledge that you need to get before the Sfjbs C1000-122 exam dumps.

Pass Guaranteed IBM First-grade C1000-122 - Db2 12 for z/OS DBA Fundamentals Best Preparation Materials  
Incorrect answers display in red, with correct answers to all questions in green, Are you still worried about IBM C1000-122, Last but not least, our worldwide after sale staffs will provide the most considerate after sale service on C1000-122 training guide for you in twenty four hours a day, seven days a week.

Now, our C1000-122 latest study vce will satisfy you and help you get the certification with ease, We believe that there is always a way to help your C1000-122 practice exam.

If you buy C1000-122 exam dumps from us, you can get the download link and password within ten minutes, When you get our C1000-122 easy prep material, you will find it is very easy to acquire [C1000-122](#) the key knowledge in the study material, which will help you study with high efficiency.

Our dumps are finished by IBM masters team with almost 98%+ [Hot HMJ-1216 Spot Questions](#) passing rate, In the process of job hunting, we are always asked what are the achievements and what certificates have we obtained?

**NEW QUESTION: 1**

A company has many applications. Each application is supported by separate on-premises databases.

You must migrate the databases to Azure SQL Database. You have the following requirements:

Organize databases into groups based on database usage.

Define the maximum resource limit available for each group of databases.

You need to recommend technologies to scale the databases to support expected increases in demand.

What should you recommend?

- A. Elastic pools
- B. Read scale-out
- C. Database sharding
- D. Managed instances

**Answer: A**

Explanation:

## Explanation

SQL Database elastic pools are a simple, cost-effective solution for managing and scaling multiple databases that have varying and unpredictable usage demands. The databases in an elastic pool are on a single Azure SQL Database server and share a set number of resources at a set price.

You can configure resources for the pool based either on the DTU-based purchasing model or the vCorebased purchasing model.

## NEW QUESTION: 2

A security alert has been raised for an Amazon EC2 instance in a customer account that is exhibiting strange behavior. The Security Engineer must first isolate the EC2 instance and then use tools for further investigation.

What should the Security Engineer use to isolate and research this event? (Choose three.)

- A. AWS Key Management Service (AWS KMS)
- B. AWS CloudTrail
- C. AWS Firewall Manager
- D. Amazon Athena
- E. Security groups
- F. VPC Flow Logs

**Answer: B,E,F**

Explanation:

Explanation

## NEW QUESTION: 3

Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar.

When you are finished performing all the tasks, click the 'Next' button.

Note that you cannot return to the lab once you click the 'Next' button. Scoring occur in the background while you complete the rest of the exam.

Overview

The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab

You may start the lab by clicking the Next button.

You plan to configure VM1 to be accessible from the Internet. You need to add a public IP address to the network interface used by VM1.

What should you do from Azure portal?

**A.** You can add private and public IP addresses to an Azure network interface by completing the steps that follow.

Step 1: In Azure portal, click More services > type virtual machines in the filter box, and then click Virtual machines.

Step 2: In the Virtual machines pane, click the VM you want to add IP addresses to. Click Network interfaces in the virtual machine pane that appears, and then select the network interface you want to add the IP addresses to. In the example shown in the following picture, the NIC named myNIC from the VM named myVM is selected:

Step 3: In the pane that appears for the NIC you selected, click IP configurations.

Step 4: Click Create public IP address.

Step 5: In the Create public IP address pane that appears, enter a Name, select an IP address assignment type, a Subscription, a Resource group, and a Location, then click Create, as shown in the following picture:

**B.** You can add private and public IP addresses to an Azure network interface by completing the steps that follow.

Step 1: In Azure portal, click More services > type virtual machines in the filter box, and then click Virtual machines.

Step 2: In the Virtual machines pane, click the VM you want to add IP addresses to. Click Network interfaces in the virtual machine pane that appears, and then select the network interface you want to add the IP addresses to. In the example shown in the following picture, the NIC named myNIC from the VM named myVM is selected:

Step 3: In the pane that appears for the NIC you selected, click IP configurations.

Step 4: Click Create public IP address.

Step 5: In the Create public IP address pane that appears, enter a Name, select an IP address assignment type, a Subscription, a Resource group, and a Location, then click Create, as shown in the following picture:

**Answer: B**
