NEW QUESTION: 2

Your client wants to set up enrollment security so that administrative users can enroll students only in classes that fall under their Academic Organization (that is, a user can enroll students in English classes but not Business). Which action would you take to ensure that this security is implemented as specified?

- A. Limit each user's Academic Organization access by using row-level security.
- B. Create Enrollment Access Groups for each group of staff

members, specify the appropriate Academic Organization, and assign the group to each staff member by using row-level security.

C. Restrict each user's access to the Schedule of Classes and Course Catalog pages by using a permission list.

D. Create and set a new value restricting an employee's Transaction Security under row-level security.

E. Modify an employee's Security Views by using row-level security.

Answer: B

NEW QUESTION: 3

You want to plan a finished material using material requirements planning in an SAP ECC system. The resulting planned orders should be scheduled using basic date scheduling (not lead-time scheduling).

Which of the following properties for the resulting dependent requirements applies?

A. In multi-level backward scheduling, dependent requirements are triggered at the start date for the planned order of the finished material.

B. When a customer order is created for the finished material, the dependent requirements are automatically triggered for the components in the bill of material without a planning run.

C. In multi-level backward scheduling, dependent requirements are calculated to the exact second.

D. If the individual material components are explicitly assigned to the operations of a routing, the requirement dates of the dependent requirements are scheduled at each start date of the operations.

Answer: A

NEW QUESTION: 4

Your network contains an Active Directory domain named contoso.com. The domain contains 100 servers.

You deploy the Local Administrator Password Solution (LAPS) to the network.

You discover that the members of a group named

FinanceAdministrators can view the password of the local

Administrator accounts on the servers in an organizational unit (OU) named FinanceServers.

You need to prevent the FinanceAdministrators members from viewing the local administrators' passwords on the servers in FinanceServers.

Which permission should you remove from FinanceAdministrators?

A. Read all properties

- B. All extended rights
- C. List contents
- D. Read permissions

Answer: B
