Answer: A,C
Explanation:
Explanation
A Site-to-Site VPN gateway connection is used to connect your
on-premises network to an Azure virtual network over an
IPsec/IKE (IKEv1 or IKEv2) VPN tunnel. This type of connection
requires a VPN device, a local network gateway, located
on-premises that has an externally facing public IP address
assigned to it.
Finally, create a Site-to-Site VPN connection between your
virtual network gateway and your on-premises VPN device.
