**NEW QUESTION: 2**

You are the Office 365 administrator for your company. The company's environment includes only Office 2013 and Windows 8. Users are not allowed to install applications on client computers.

You need to enable Office Telemetry logging.

What should you do?

**A.** In Group Policy, enable logging in the User Configuration\Administrative Templates\Microsoft Office 2013\Telemetry Dashboard node.

**B.** Create a .reg file that sets the registry values under the HKEY\_CURRENT\_USER\Software\Policies\Microsoft\Office\15.0\OSM key to enable the Telemetry Agent to collect and upload data. Run the .reg file with standard privileges.

**C.** In Group Policy, enable logging in the User Configuration\Administrative Templates\Microsoft Office 2013\Telemetry logging node.

**D.** Create a .reg file that sets the registry values under the HKEY\_LOCAL\_MACHINE\Software\Microsoft\Office\15.0 key to enable Telemetry Agent to collect and upload data. Run the .reg file with standard privileges.

**Answer: A**

Explanation:

The Telemetry Agent must be enabled using Group Policy or the registry.

For production environments that contain hundreds or thousands of client computers, you can use Group Policy administrative templates.

You can use Group Policy to enable and configure Telemetry Agents. Download the Group Policy administrative template files from the Microsoft Download Center. The policy settings are available in the path User Configuration\Administrative Templates\Microsoft Office 2013\Telemetry Dashboard.

Incorrect:

Not C: Incorrect Group Policy Node.

Not D: Incorrect Registry key.

Not B: This would work, but it would require too much administrative effort. For production environments that contain hundreds or thousands of client computers, you should use Group Policy administrative templates.

Note: Use the registry to enable and configure Telemetry Agent. The easiest way to update the registry on a single client is to run a .reg file that sets the registry values that enable Telemetry Agent to collect and

upload data.

Telemetry Agent registry settings are located under

HKEY\_CURRENT\_USER\Software\

Policies\Microsoft\Office\15.0\OSM key.
