**NEW QUESTION: 3**
Refer to the exhibit.

Which statement describes the effect on the network if
FastEthernet0/1 goes down temporarily?
**A.** FastEthernet0/2 stops forwarding traffic until
FastEthernet0/1 comes back up.
**B.** FastEthernet0/2 forwards traffic indefinitely.
**C.** FastEthernet0/2 forwards traffic only until FastEthernet0/1
comes back up.
**D.** FastEthernet0/1 goes into standby.
**Answer: B**
Explanation:
Use the switchport backup interface interface configuration
command on a Layer 2 interface to configure Flex Links, a pair
of interfaces that provide backup to each other. Use the no
form of this command to remove the Flex Links configuration.
With Flex Links configured, one link acts as the primary
interface and forwards traffic, while the other interface is in
standby mode, ready to begin forwarding traffic if the primary
link shuts down. The interface being configured is referred to
as the active link; the specified interface is identified as
the backup link. The feature provides an alternative to the
Spanning Tree Protocol (STP), allowing users to turn off STP
and still retain basic link redundancy.
