NEW QUESTION: 1

- A. Option A
- B. Option C
- C. Option D
- D. Option B

Answer: B

Explanation:

* Blob Leases allow you to claim ownership to a Blob. Once you have the lease you can then update the Blob or delete the Blob without worrying about another process changing it underneath you. When a Blob is leased, other processes can still read it, but any attempt to update it will fail. You can update Blobs without taking a lease first, but you do run the chance of another process also attempting to modify it at the same time.
* You can opt to use either optimistic or pessimistic

concurrency models to manage access to blobs and containers in the blob service.

NEW QUESTION: 2

Your company has an Exchange Server 2016 organization.

You plan to allow several users to access the mailboxes of the other group.

You need to ensure that a user named User1 can read and delete the email messages in the mailbox of a user named User2. User1 must add the mailbox of User2 manually to the Microsoft Outlook profile.

What command should you run? To answer, select the appropriate options in the answer area.

Answer:

Explanation:

Explanation

NEW QUESTION: 3

Which two statements are true regarding task assignments?

Select two.

A. A Team Filter Service can be used to dynamically configure the members of the team that is assigned to the task.

B. Tasks assigned to "Lane", "Team" or the deprecated task assignment options can be viewed in the Team Performance dashboard.

C. A process variable is required in the "Team Filter Service Input Mapping" to receive the dynamic team that is returned by the TeamFilter Service.

D. To assign a team of subject matter experts, select a team for the "Experts Team" option.

E. When Assign To is set to "Team" the team that is assigned to the swimlane in the BPD will receive the task at runtime.

Answer: B,E

NEW QUESTION: 4

Complete the statement. A security profile can block or allow traffic.

A. after it is evaluated by a security policy that allows traffic

B. on unknown-tcp or unknown-udp traffic

C. after it is evaluated by a security policy that allows or

blocks traffic

D. before it is evaluated by a security policy

Answer: A

Explanation:

Security profiles are not used in the match criteria of a traffic flow. The security profile is applied to scan traffic after the application or category is allowed by the security policy.
