Answer: B

NEW QUESTION: 2

Ihr Netzwerk enthält eine Active Directory-Domäne mit dem Namen adatum.com. Die Domäne verfügt über eine Zertifizierungsstelle mit dem Namen CA1.

Auf allen Servern wird Windows Server 2012 R2 ausgeführt. Auf allen Clientcomputern wird Windows 10 ausgeführt.

Sie müssen der Domäne einen Datenwiederherstellungsagenten für das verschlüsselnde Dateisystem (EFS) hinzufügen.

Was tun?

A. Wählen Sie in der Standarddomänenrichtlinie die Option Datenwiederherstellungs-Agent erstellen aus.

B. Wählen Sie in der Standardrichtlinie für Domänencontroller die Option Datenwiederherstellungs-Agent hinzufügen aus.

C. Wählen Sie in der Standardrichtlinie für Domänencontroller die Option Datenwiederherstellungs-Agent hinzufügen aus.

D. Wählen Sie in der Standarddomänenrichtlinie die Option Datenwiederherstellungs-Agent hinzufügen aus.

Answer: D

NEW QUESTION: 3

You need to ensure that NAP meets the technical requirements. Which role services should you install?

A. Health Registration Authority, Host Credential Authorization Protocol and Online Responder

B. Certification Authority, Network Policy Server and Health Registration Authority

C. Online Responder, Certification Authority and Network Policy Server

D. Network Policy Server, Health Registration Authority and Host Credential Authorization Protocol

Answer: B

Explanation:

*Scenario:

Implement Network Access Protection (NAP).

Ensure that NAP with IPsec enforcement can be configured.

*Health Registration Authority

Applies To: Windows Server 2008 R2, Windows Server 2012

Health Registration Authority (HRA) is a component of a Network Access Protection (NAP)

infrastructure that plays a central role in NAP Internet Protocol security (IPsec)

enforcement.

HRA obtains health certificates on behalf of NAP clients when they are compliant with

network health requirements. These health certificates

authenticate NAP clients for IPsec-protected communications with other NAP clients on an intranet. If a NAP client does not have a health certificate, the IPsec peer authentication fails and the NAP client cannot initiate communication with other IPsec-protected computers on the network.

HRA is installed on a computer that is also running Network Policy Server (NPS) and Internet

Information Services (IIS). If they are not already installed, these services will be added when you install HRA.

Reference: Health Registration Authority
