Explanation:

* With NPS, you can create client health policies using SHVs that allow NAP to detect, enforce, and remediate client computer configurations.

WSHA and WSHV provide the following functionality for NAP-capable computers:

The client computer has firewall software installed and enabled.

* Example measurements of health include:

The operational status of Windows Firewall. Is the firewall enabled or disabled?

In NAP terminology, verifying that a computer meets your defined health requirements is called health policy validation. NPS performs health policy validation for NAP.

NEW QUESTION: 3

Reuse Model states:

- A. Systems should be built using custom-building new components
- B. Build a simplified version of the proposed system
- C. Systems should be built using existing components
- D. Create a demand for a new method of developing systems

Answer: C
