What are the two characteristics of IPS?

- A. It is cabled directly inline
- B. Does not add delay to traffic
- C. Can drop traffic
- D. Can't drop packets on its own

**Answer: A,C**

Explanation:

+ Position in the network flow: Directly inline with the flow of network traffic and every packet goes through the sensor on its way through the network.

+ Mode: Inline mode

+ The IPS can drop the packet on its own because it is inline. The IPS can also request assistance from another device to
