At last, they reorganize the HPE2-W07 learning questions and issue the new version of the study materials.

#### **NEW QUESTION: 1**

A customer has two data centers (Site A and Site B). There is an Isilon cluster in each data center and they use SyncIQ to replicate data between the two data centers.

You have reviewed their disaster recovery plan and found the following:

-The policies specify that SyncIQ runs a replication job every 3 hours and that the job finishes within 1 hour. -Three additional hours will be needed to get servers and the network redirected to work from Site B.

What is the Recovery Point Objective in this plan?

- A. 5 Hours
- B. 4 Hours
- C. 2 Hours
- D. 3 Hours

**Answer: B**

#### **NEW QUESTION: 2**

A company wants to provide a new application prototype to any

client to process their data. The intention is to start with a simple management system that provides a service to handle electronic contact requests. After a first evaluation of the solution, it is decided to use a WebSphere JCA adapter for e-Mail. The data will be processed by secured downstream SCA components once the data is sent to the adapter. What should be done to integrate the adapter solution in a secured WebSphere Process Server environment?

- A.** Advise the development team to configure the security identity on all components connected with the adapter. Deploy the application and map the security identity.
- B.** Consult the e-Mail service provider regarding the communication protocol. Secure the connection between the adapter and the service provider using SSL or similar protocols.
- C.** Advise the development team to enhance the service interface to retrieve customer specific information (e.g. user name and password). Each request sent to the adapter must be authorized for processing first.
- D.** No action is required. WebSphere JCA adapters do not provide any authentication or authorization mechanism for inbound and outbound operations.

**Answer: A**

### **NEW QUESTION: 3**

You are asked to check the status of several user-mode processes on the management server and gateway. Which of the following processes can only be seen on a Management Server?

- A.** fwm
- B.** fwd
- C.** cpwd
- D.** cpd

**Answer: A**
