NEW QUESTION: 1

A. Option A
B. Option D
C. Option C
D. Option B
Answer: C
Explanation:
In Windows Server 2008 R2, an accounting configuration wizard
is added to the Accounting node in the NPS console. By using
the Accounting Configuration wizard, you can configure the
following four accounting settings:
- SQL logging only. By using this setting, you can configure a
data link to a SQL Server that allows NPS to connect to and
send accounting data to the SQL server. In addition, the wizard
can configure the database on the SQL Server to ensure that the
database is compatible with NPS SQL server logging.
- Text logging only. By using this setting, you can configure
NPS to log accounting data to a text file.
- Parallel logging. By using this setting, you can configure
the SQL Server data link and database. You can also configure
text file logging so that NPS logs simultaneously to the text
file and the SQL Server database.
- SQL logging with backup. By using this setting, you can
configure the SQL Server data link and database. In addition,
you can configure text file logging that NPS uses if SQL Server
logging fails.
