Answer: B

NEW QUESTION: 2

Your network contains an Active Directory forest. The forest contains two Active Directory domains named contoso.com and child.contoso.com. The forest functional level is Windows Server 2003. The functional level of both domains is Windows Server 2008.

The forest contains three domain controllers. The domain controllers are configured as shown in the following table.

DC1 and DC2 have the DNS Server server role installed and are authoritative for both contoso.com and child.contoso.com. The child.contoso.com domain contains a server named server1.child.contoso.com that runs Windows Server 2012. You plan to deploy server1.child.contoso.com as a read-only domain controller (RODC). You run the adprep.exe /rodcprep command on DC3 and receive the following error message:

You need to identify what prevents you from successfully running Adprep /rodcprep on DC3.

What should you identify?

- A. The domain functional level of child.contoso.com is set to the wrong level.
- B. The forest functional level is set to the wrong level.
- C. DC3 cannot connect to the domain naming master on DC1.
- D. DC3 cannot connect to the infrastructure master on DC2.

Answer: D

Explanation:

Adprep could not contact a replica... This problem occurs when the Adprep /rodcprep command tries to contact the infrastructure master for each application partition in the forest.

Reference:

Error message when you run the "Adprep /rodcprep" command in Windows Server 2008: "Adprep could not contact a replica for partition DC=DomainDnsZones,DC=Contoso,DC=com" <https://support.microsoft.com/en-us/kb/949257>

NEW QUESTION: 3

Your company has an Active Directory domain. You log on to the domain controller. The Active Directory Schema snap-in is not available in the Microsoft Management Console (MMC).

You need to access the Active Directory Schema snap-in. What should you do?

- A. Log off and log on again by using an account that is a member of the Schema Admins group.
- B. Register Schmmgmt.dll.
- C. Use the Ntdsutil.exe command to connect to the schema master operations master and open the schema for writing.
- D. Add the Active Directory Lightweight Directory Services (AD/LDS) role to the domain controller by using Server Manager.

Answer: B

Explanation:

Install the Active Directory Schema Snap-In You can use this procedure to first register the dynamic-link library (DLL) that is required for the Active Directory Schema snap-in. You can then add the snap-in to Microsoft Management Console (MMC).

To install the Active Directory Schema snap-in:

1.To open an elevated command prompt, click Start, type command prompt and then right-click Command Prompt when it appears in the Start menu. Next, click Run as administrator and then click OK.

To open an elevated command prompt in Windows Server 2012 R2, click Start, type cmd, right-click cmd and then click Run as administrator.

2.Type the following command, and then press ENTER: regsvr32 schmmgmt.dll

3.Click Start, click Run, type mmc and then click OK.

4.On the File menu, click Add/Remove Snap-in.

5.Under Available snap-ins, click Active Directory Schema, click Add and then click OK.

6.To save this console, on the File menu, click Save.

7.In the Save As dialog box, do one of the following:

*To place the snap-in in the Administrative Tools folder, in File name, type a name for the snap-in, and then click Save.

*To save the snap-in to a location other than the Administrative Tools folder, in Save in , navigate to a location for the snap-in. In File name, type a name for the snap-in, and then click Save.
