If they used our NS0-519 test braindumps they had passed exams at first shot and own the certification.

NEW QUESTION: 1

DRAG DROP

Answer:

Explanation:

=====

Topic 5, Tailspin toys

Tailspin toys is a toy manufacturer. The company headquarters is located in Melbourne.

The company has a design and development office located in Singapore. The company also has branch offices in Hong Kong, Jakarta, Tokyo, Sydney, and Auckland. Tailspin

Toys has implemented Skype for Business Server 2015 and is actively using instant messaging (IM), presence, peer-to-peer audio and video, conferencing, remote access, and federation. The company uses Exchange Online.

The number of users in each office is shown in the following table:

Existing Environment

Networks

You have the following networks:

The network latency between each branch site and the central site is more than 25ms.

Based on the network latency, you use the RTAudio codec for all public switched telephone network (PSTN) calls from the branch sites.

All Windows desktop client computers run Windows 7, Windows 8.1, or Windows 10 and are domain joined.

Skype for Business

Singapore and Melbourne each have the following Skype for Business Server 2015 components:

A front-end pool with three front-end servers

A back-end pool that is configured as a two server SQL AlwaysOn availability group

A single Edge Server

A single Reverse Proxy server

A single Office Web App server

Tailspin Toys currently uses a third-party dial-in conferencing provider. Moving dial-in conferencing from the third-party dial-in conferencing provider to the new Skype for

Business solution will add a maximum concurrency of 50 PSTN calls to the Melbourne and

Singapore sites, respectively.

PBX and Dial plans

The following table shows the call load for the existing IP PBX solution:

The following table details the Dial Plan for the Sydney

office:

User issues

Users report the following issues:

Users in Hong Kong report issues with media quality when using Skype for Business conferencing features.

Users who need to use Call Via Work report that this option is not visible in their desktop client.

Users in the Auckland office report issues regarding call quality. You identify that the issue relates to use of non-qualified devices. You purchase new qualified devices and have delivered the device to the Auckland office.

After the migration from the existing IP-PBX, users in Sydney report that they cannot make calls to mobile numbers.

User1 is located in the Auckland office. User1 reports persistent call quality issues. You generate the following diagnostic report for User1:

Caller Device and Signal Metrics:

Audio Stream (Caller->Callee)

Audio Stream (Callee -> Caller)

Requirements

Business Requirements

You have the following business requirements:

You must centralize voice services and reduce the costs associated with long distance and international calls.

You must implement a single voice solution across the enterprise.

Any planned changes to the solution must minimize administrative and financial costs.

Executives must be allowed to use third party tablets and mobile devices.

Executives must be able to receive inbound calls even under bandwidth constrained situations.

Technical Requirements

You have the following technical requirements. The new Skype for Business solution needs to replace the existing third-party party dial-in conferencing provider.

Network requirements:

Prioritize Skype for Business traffic on the network where possible.

Avoid over-subscription on bandwidth constraint network sites.

Unified Messaging requirements:

Tailspin toys prefers to use voice mail as part of Exchange Online.

Enterprise Voice requirements:

Provide enterprise voice to all users in all locations.

Ensure that the solution is highly available.

PSTN connections must be centralized to Melbourne and Singapore.

You must implement Call Via Work functionality for specific

users.

NEW QUESTION: 2

What should you configure before you Create goals in Microsoft Dynamics CRM?

- A. Goal Metric
- B. Target Value
- C. Fiscal Period
- D. Goal Owner

Answer: D

NEW QUESTION: 3

With IBM Mobile Foundation, applications are built for a target Mobile Foundation Server and have a server-side configuration on the target server. What must be done to an application on the Mobile Foundation Server before it can be configured?

- A. Register the application
- B. Update the service proxy
- C. Apply basic security
- D. Expose the application in the service registry

Answer: A

Explanation:

Explanation

Applications are built for a target MobileFirst Server and have a server-side configuration on the target server.

You must register your applications on the MobileFirst Server before you can configure them.
