**NEW QUESTION: 2**

ACE Inc. had been using a standard marketplace router as an NVA (Network Virtual Appliance) in the hub Virtual Network (VNet) for spoke to spoke communication. The NVA has just been replaced by Azure Firewall. Now the security operations team is reporting that traffic between Virtual Machines in the same VNet is working however any inter-VNet traffic is being dropped by the NSGs (Network Security Groups) at destination. What could be a possible reason?

A. Azure Firewall is doing SNAT for inter-VNet traffic  
 B. BGP routes in UDR need to be updated  
 C. There is no route at the Azure Firewall  
 D. Azure Firewall is blocking all the traffic

**Answer: A**

**NEW QUESTION: 3**

An organization has a widely distributed online environment, where applications are connected via WebSphere MQ messaging. A business requirement is brought forward that certain mission critical applications record audit trail data which is to be collected in a central location. No information can be lost. A central data warehouse must be loaded daily with this information as soon as possible after end of business. Which of the following proposed solutions is best in terms of the requirement, reliability and overall performance? The audit trail data is:

A. inserted into a central database table via a remote access database client under control of the local WebSphere MQ transaction.

- B. sent as a persistent WebSphere MQ message and forwarded to the queue manager of the central server asynchronously.
- C. written to a file on the local file system and transmitted to the central audit trail server via reliable file transfer over WebSphere MQ.
- D. inserted into a local database table under two phase commit using WebSphere MQ as the transaction manager and a bulk update is performed at end of day.

**Answer: B**
