NEW QUESTION: 2

Which three options are factors you have to take into account when identifying solutions and services in the context of the customer's industry vertical to meet their outcomes?

(Choose three.)

- A. Sales approach and sales cycle differs across industry verticals.
- B. The value proposition has to be aligned to the nature of the business.
- C. Technology consumption across verticals differs.
- D. Business outcomes are the same for most of the industry verticals.
- E. The regulatory requirements impede Cisco from participating in government bids.

Answer: A,B,C

NEW QUESTION: 3

Which of the following types of test tool are most likely to include traceability functions?

- (i) Performance testing tool
 - (ii) Requirements management tool
 - (iii) Configuration management tool
 - (iv) Static analysis tool
- A. (ii) and (iii)
 - B. (i) and (iv)
 - C. (i) and (ii)
 - D. (iii) and (iv)

Answer: A

Explanation:

Requirements management tools (ii) have traceability because

they enable test conditions and subsequently test scripts and defects to be traced back to requirements. Configuration management tools (iii) also need to trace the appropriate version of a test script to the release or version of a system or module.

Performance monitoring tools (i) and static analysis tools (iv) are designed for specific objectives. Neither of these tools particularly need traceability functions.
