NEW QUESTION: 1

- A. Option C
- B. Option B
- C. Option A
- D. Option D

Answer: A

Explanation:

NEW QUESTION: 2

To enable remote devices to send log messages to Dimension through the gateway Firebox, what must you verify is included in your gateway Firebox configuration? (Select one.)

- A. You must add a policy to the remote device configuration file to allow traffic to a Dimension.
- B. You must change the connection settings in Dimension, not on the gateway Firebox.
- C. You can only send log messages to Dimension from a computer that is on the network behind your gateway Firebox.
- D. You must make sure that either the WG-Logging packet filter policy, or another policy that allows external connections to Dimension over port 4115, is included in the configuration file.

Answer: A

NEW QUESTION: 3

Your company plans to deploy Windows 7 Enterprise.

The current client computers run either Windows XP Professional or Windows Vista Enterprise.

The company uses 20 custom applications that were written for Windows XP.

You need to create a log of compatibility issues for the custom applications.

What should you do?

- A.** Install each application on a Windows XP client computer. Sequence each application by using Microsoft Application Virtualization (App-V).
- B.** Install each application on a Windows 7 client computer, and then run the Application Compatibility Toolkit (ACT).
- C.** Install each application on a Windows Vista client computer. Sequence each application by using Microsoft Application Virtualization (App-V).
- D.** Install each application on a Windows XP client computer, and then run the Application Compatibility Toolkit (ACT).

Answer: D
