We are here to provides you offer better then Sfjbs CISA dump Q&A, We have tried our best to simply the difficult questions of our CISA practice engine to be understood by the customers all over the world.

NEW QUESTION: 1

You administer an Azure environment that includes six Azure Resource Manager (ARM) virtual machines (VMs) that support development. The development team uses Azure SQL databases and Azure Queues for application storage. All Azure resources are grouped within a single subscription and resource group. You need to reduce the recurring monthly Azure costs without degrading server performance. You must minimize the administrative effort involved.

What should you do?

- A.** Create an Azure Automation runbook that compresses unused virtual hard disk (VHD) files daily.
- B.** Remove the development team role from the resource group daily.
- C.** Create an Azure PowerShell script that backs up and deprovisions all Azure SQL databases daily.
- D.** Create an Azure Automation runbook that cycles the VMs daily.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

Schedule startup and shutdown of your virtual machines using

Azure Automation. The processes you want to automate can be done through runbooks Reference:
