Also our IT staff checks and updates the latest version into website every day, Use our CTAL-TA_Syll2019_UK quiz prep.

NEW QUESTION: 1

The information security policy that states 'each individual must have their badge read at every controlled door' addresses which of the following attack methods?

- A. Shoulder surfing
- B. Dumpster diving
- C. Impersonation
- D. Piggybacking

Answer: D

Explanation:

Explanation/Reference:

Explanation:

Piggybacking refers to unauthorized persons following authorized persons, either physically or virtually, into restricted areas. This policy addresses the polite behavior problem of holding doors open for a stranger, if every employee must have their badge read at every controlled door no unauthorized person could enter the sensitive area

A. Looking over the shoulder of a user to obtain sensitive information could be done by an unauthorized person who has gained access to areas using piggybacking, but this policy specifically refers to physical access control. Shoulder surfing would not be prevented by the implementation of this policy. Dumpster diving, looking through an organization's trash for valuable information, could be done outside the company's physical perimeter; therefore, this policy would not address this attack method. Impersonation refers to a social engineer acting as an employee, trying to retrieve the desired information. Some forms of social engineering attacks could join an impersonation attack and piggybacking, but this information security policy does not address the impersonation attack.

NEW QUESTION: 2

You noticed a recent change to the BGP configuration on a PE router, the bgp scan time has been changed from the default value to 30s. Which three effects will this change have?

(Choose three.)

- A. The BGP convergence time will increase
- B. The BGP keepalive messages will be sent to the BGP peers at a faster rate
- C. The BGP table will be examined and verified more frequently
- D. The CPU load of the router will increase
- E. The minimum time interval between sending EBGP and IBGP routing updates will decrease
- F. The BGP table will be modified more quickly in the event that a next-hop address becomes unreachable

Answer: C,D,F

NEW QUESTION: 3

An administrator would like to troubleshoot why templating is not working for some traffic. How can he determine at which rule templating is disabled?

- A. He can use the fwaccel stat command on the Security Management Server.
- B. He can use the fwaccel stat command on the gateway
- C. He can use the fw accel stat command on the gateway.
- D. He can use the fw accel statistics command on the gateway.

Answer: B

NEW QUESTION: 4

First National Bank made a loan to a nonbank affiliate of its holding company that is secured by stocks, bonds, and debentures. At the outset of the loan, First National had collateral with a market value equal to 150 percent of the loan amount. Over time, some of the collateral has been retired and amortized. Some has dropped in value. What is the responsibility of the bank regarding the collateral?

- A. The bank must annually check the value of the collateral to ensure that the percentage of value is maintained.
- B. The bank must check values every month to ensure that the percentages are correct at all times.
- C. The bank must check values when the collateral is retired or amortized to make sure the collateral is replaced with securities that will bring the loan into compliance with the percentages required in the law.
- D. The bank has no responsibility once the loan is made provided the percentages were correct at the loan's inception.

Answer: C
