NEW QUESTION: 1
Which step is important when you define pain points for a multidepartment business initiative?
A. Use a survey to gain feedback on service-level expectations for network infrastructure.
B. Prioritize needs and opportunities across the full scope of the departments.
C. Avoid using customer estimates of benefits since the departments are likely overstating value and competing for funding.
D. Ask each department to rate their priorities on a 1-10 scale of importance.
Answer: B

NEW QUESTION: 2

A. PPP

B. DHCP
C. APPA
D. BOOTP
Answer: A

NEW QUESTION: 3
You use the Task.Run() method to launch a long-running data
processing operation. The data processing operation often fails
in times of heavy network congestion.
If the data processing operation fails, a second operation must
clean up any results of the first operation.
You need to ensure that the second operation is invoked only if
the data processing operation throws an unhandled exception.
What should you do?
A. Create a task by calling the Task.ContinueWith() method.
B. Create a task within the operation, and set the
Task.StartOnError property to true.
C. Create a TaskFactory object and call the ContinueWhenAll()
method of the object.
D. Use the TaskScheduler class to create a task and call the
TryExecuteTask() method on the class.
Answer: A
