Why we can give you a promise that we will fully refund the money you purchased our software if you fail EX427 exam with our dump, Therefore, users can pass EX427 exams with very little learning time.

NEW QUESTION: 1
DRAG DROP
A company uses SharePoint and Microsoft Dynamics CRM to manage customers. External users log in to the SharePoint site by using forms-based authentication.
The company needs to authenticate users by using a custom claims provider.
You have the following requirements:
1. Site administrators must be able to locate users in CRM.
2. Site administrators must be able to select users based on their roles in CRM.
3. Site administrators must be able to confirm that users exist in CRM.
You need to implement the custom claims provider.
How should you complete the relevant code? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.) Select and Place:

Answer:
Explanation:

Explanation/Reference:
Requirement 1:
* FillHierarchy.SupportsHierarchy property
When implemented in a derived class, determines whether the claims provider supports hierarchical display.
* FillHierarchy
If you want to display hierarchy on the left pane of the claims picker, you must implement the FillHierarchy method and the SupportsHierarchy property in the SPClaimProvider class.
Requirement 2:
FillSearch.SupportSearch
If you want to be able to search for claims in the People Picker control, you must implement the Fillsearch method and Microsoft.SharePoint.Administration.Claims.SupportSearch property.
The SupportsSearch must return true.
Requirement 3: FillResolve.SupportResolve
A People Picker with claims picking functionality is sometimes referred to as a claim picker. If you want to be able to resolve claims by using the type-in control of the claims picker, you must implement this method and implement the SupportResolve() property to return true.
Incorrect:
* FillClaimsForEntity.SupportsEntityInformation
When you include additional claims in a user's security token, you are augmenting claims. If you want to augment claims, you must implement the FillClaimsForEntity method. In addition, you must also set the SupportsEntityInformation property to true in the SPClaimProvider class. In order for this method to be invoked, the SupportsEntityInformation must return true.
