**Answer: C**

**NEW QUESTION: 2**

Scenario: A Citrix Architect needs to design a new XenApp and XenDesktop environment for a financial services company. During the project kickoff meeting, the organization states the following business priorities:

"Overall, we want a robust solution which ensures that users can access their resources at any time, even if our primary datacenter experiences an outage. Our employees will need to access their resources from both inside and outside our corporate network, but we need to ensure that we enable this in a secure manner and protect our sensitive data." Which four design decisions align with the organization's stated business drivers? (Choose four.)

- A. Single image management should be included in the design.
- B. Server OS Virtual Delivery Agent (VDA) machines should be used to increase user density per machine.
- C. Redundancy should be implemented for all infrastructure components.
- D. SmartAccess or SmartControl features should be considered for this environment.
- E. A multi-Site architecture and disaster recovery plan will be required.
- F. Optimal Gateway Routing should be configured on StoreFront.
- G. NetScaler will be required in the environment.

**Answer: B,D,F,G**
