NEW QUESTION: 3

A company is using Amazon SQS to process data. The company has a single queue and a single consumer. The consumer is processing messages at a rate of 14 messages per second. The consumer is currently processing 7 messages. How many messages are currently in the queue?

- A. 14
- B. 7
- C. 4
- D. 1

Answer: A

Explanation:

The consumer is currently processing 7 messages.

The consumer is processing messages at a rate of 14 messages per second. The consumer is currently processing 7 messages. The number of messages in the queue is the number of messages being processed by the consumer plus the number of messages currently in the queue. The number of messages currently in the queue is 14 - 7 = 7.
